

LEONARDO BOYER

Great Toronto, Ontario

tecnoboyer@gmail.com | <https://www.linkedin.com/in/leonardo-boyer/>

SKILLS

- React.js | React Native.js | Nuxt.js | HTML | CSS | JavaScript | ECMAScript 6 | Redux | Apollo GraphQL | iOS Development | Android Development | AndroidTV | Web Development | Webpack
- Python | Node.js | Express.js | RESTful APIs | Mongoose | MongoDB | SQL | MySQL | AWS DynamoDB | AWS-Lambda | AWS-S3 | C/C++ | Object-Oriented Programming Languages | Web Service Design
- Nginx | Terraform CI/CD | AWS-Lambda | AWS-S3 | AWS-DynamoDB | SCM (Version control systems like GitHub) | Agile | SCRUM | Jira
- Electrical Infrastructure Installation | Electrical Assessment | Electromechanical Network for Data Center | Predictive Maintenance Planning for Multi-trade Repairs | CNC Lathes | Milling Machines | Grinders | SPMs | PLC | SCADA | GSM | ARM Microcontroller | I2C | UART | CAN Bus | SNMP | Nagios | Hardware Layer (ESP8266, Real-time Data Acquisition)
- Process Improvement | Vendors Management | Data Analysis | Audit Scheduling and Improvement | Safety Protocols | 5S Principles | Auditing | Visual Management Standards | Troubleshooting and Debugging (Full Stack) | Project Management (PM Principles)

WORK HISTORY

Lean subject Matter Expert

Jhonson Electronic | Canada (Ancaster, Ontario) January 2024 – January 2025

- Initiated and managed lean manufacturing projects, leading meetings to ensure adherence to timelines. As a result, 300KCAD where invested in Plant Improvement.
- Responsible for developing Lean audits and scheduling, along with improving the auditing system, resulting in 89 audits being conducted.
- Developed visual management standards by defining, modifying, and maintaining Lean procedures and 5S standards, updating three standards in the process.
- Worked with vendors on projects, obtained quotes, and submitted purchase orders. Successfully had a new rack quote approved, three wall-side quotes approved, a 7,000 CAD steamer and vacuum machine procured, four quotes for outsourcing electrical installation approved, and three quotes for light fixture replacement approved.

Set-Up

Jhonson Electronic | Canada (Ancaster, Ontario)

October 2023 – January 2024

Production Associate

Jhonson Electronic | Canada (Ancaster, Ontario)

August 2023 - October 2023

Senior Software Engineer

Warner Brothers | Georgia Atlanta - remote

April 2022 - August 2023

- Created applications to delivery sport content to ends user on different screens : Tozen, iOS, AndroidTV, Android and Web . Collaborated in the creation of TNT sport, keeping the benefits of Stadium TNT (React.js,typescript, Apollo GraphQL, RESTful , REST API , S.O.L.I.D.).
- Created data driving to export data from Mongo to Dalton. Successfully migrated 1,2M users from legacy platform to the new confederated Data Shore, ensuring minimal disruption to users. (Python, AWS-Lambda, AWS-S3, AWS-DynamoDB, Terraform , CD-CI) .
- Added value to the current offering in terms of adding new payment options, new provider enrollment - BTB, creating containers for every country's laws. Created the new payment periods in the platform (automated tests).
- Worked with different departments around the globe to develop sport vertically. Efficiently integrated into Scrum ceremonies with the TNT Sport Cell, collaboration and ensuring timely delivery of high-quality software solutions .

Senior Software Engineer

WarnerMedia | Chile

August 2019 – April 2022

- Developed and designed fragments of critical software for a CRM which drove data from SQL server enriching API consumption of the CRM. (Nuxt.js, Node.js, Express, MongoDB, Github, ECMAScript 6).
- Developed and designed financial manager integration with SAP (Node.js, Linux) .
- Developed a data drive to study customer behaviour with Python using PyMongo and Panda libraries to be integrated into Adobe in SQL data structures (Python,ETL).
- Optimized and improved backend operation by driving an update plan from MongoDB community platform to MongoDB Atlas enterprise.
- Integrated a Payment Gateway and this payment method allowed to integrate debit card recurrence (Node.js, Express, typescript, Mongoose, automated tests).
- Developed and designed integration system for employee management (Python, SQL, MongoDB,VUX,HTML,GitHub,CSS,Agile Methodologies).
- Implemented load-balancing and instance scaling strategy at AWS level (JavaScript, Mongoose, ALB ,).

Research Engineer

A J Ingenieros | Chile

November 2018 – April 2019

- Leveraged the Project Management principles to integrate the other teams (PM).
- Troubleshooted and debugged issues across the full stack.

EDUCATIONAL HISTORY

Universidad Central de Venezuela, Venezuela

Faculty of Engineering.

Grade: Bachelor's degree in electrical engineering

Canada validator: **World Education Services validation #4666941IMM**

Universidad Central de Venezuela, Venezuela

Faculty of Pure Sciences.

Grade: Incomplete Degree in Mathematics.
